Brand

Milligans Grain Based Feeds – 0800 STOCKFEED

Intended Use

Calf Feed, **Not for human consumption**

Product Information

Milligans Calf Super Starter is a premium quality feed designed for calves reared for both beef and dairy heifer replacements from four days old. Milligans Calf Super Starter is a high protein (20%), balanced palletised feed designed to bridge the energy/protein gap and meet the calf's rapidly growing nutritional needs from four days old.

Contains patented flavour, *Rumasweet®, to promote feed intake and Bovatec® to aid in the prevention of coccidiosis.

Suggested Feeding Rates

This feed is designed to be fed to calves from 4 days old till after weaning. Introduce feed gradually, increasing amounts offered and ensuring feed is cleaned up every day. Provide fresh feed adlib each day. Provide calves with access to clean, good quality roughage (dry hay or straw) of up to 10% of their diet. Ensure calves always have access to clean, fresh water. Wean calves from milk when they are consuming 1.0 kg of feed for three consecutive days. Continue feeding Milligans Calf Super Starter Mix at 1 – 1.5kg/calf per day for three – four weeks after weaning from milk (Approximately 10-12 weeks of age). This helps to maintain growth rates and protects calves against coccidiosis, which can often appear post-weaning. Feeding pellets beyond this stage can also be beneficial particularly if environmental conditions and/or pasture quality is poor. Visit www.milligansfeeds.co.nz for further information
