

GOcalf BOOST Calf Milk Replacer

This CMR manufactured by Milligans Feeds is a basic blend made from quality milk powders designed to meet the nutritional requirements of young calves.

Brand

GO Milk Replacers – Give your animals more GO!

Intended Use

Calf Milk Replacer, **Not for human consumption**

Product Information

This CMR manufactured by Milligans is a basic blend made from quality milk powders designed to meet the nutritional requirements of young calves.

GOcalf BOOST can be fed to calves from day 4 but is better suited as a two-stage product due to its lower protein content. As with all animals, colostrum should be fed for the first 4 days before starting them on a CMR such as GOcalf BOOST.

Bovatec is now included in GOcalf BOOST as an aid in the prevention of coccidiosis.

Suggested Feeding Rates

GOcalf is a quality economy milk replacer, that can be fed on either the Once a Day or Twice a Day feeding system.

And is an excellent two stage product if initially feeding whole milk, colostrum, or premium Calf Milk Replacer such as Milligans ExcelPlus or Classic and completing the rearing up to weaning with GOcalf.

It can also be fortified with colostrum or whole milk to extend its feeding time. See product packaging for recommended feeding table. Or visit www.milligansfeeds.co.nz
